Ron reports that there's a TV series running in the USA called "The Americans". It takes place in Washington DC in the early 80-s during the Reagan presidency. The story line is two deep cover KGB spies (husband and wife) carry out their spy missions here in the US. In a couple of episodes they huddle around a shortwave radio copying down a YL reading 5-figure groups, then look up the meaning of the groups in their handy dandy notebook.

---

The Conet project will be re-issued with an extra (5<sup>th</sup>) CD: <http://www.irdial.com/conet.htm>

---

Lots of Russian military activity was noted on the 28<sup>th</sup> due to an unexpected exercise announced by mr Putin on the 28th at 0400 hrs. 36 vessels based at Black Sea bases in Sevastopol and Novorossiisk and ca 250 combat armored vehicles would be used in the drill, plus several aircraft.

## **V24**

Token was so kind to post an update for V24 and M95. Much appreciated, Token!!

*Hello all,*

*It has been a while since I have reported anything. I have, however, been doing some recording and working on a new V24 and M94 schedule.*

*V24 is still active with its "new", deeper sounding, voice (started last year). It appears to have a very slightly reduced number of transmissions each month. I have been looking to see if it has shifted some traffic to new frequencies but so far have not located any, they still appear to be using the same four frequencies they down-sized to last year (4900, 5115, 6215, and 6310 kHz).*

*The 5115 kHz frequency is often slightly QRMed by Chinese OTHR. However, the signal is generally so strong that the QRM is hardly noticeable. The 4900 kHz frequency can be QRMed (in the western US) by the USCG transmissions on 4905 kHz, in California a good filter is required.*

*V24 in the past has habitually, most of the time, started on exactly the right time. XX00 and XX30 almost to the second. Over the last year I have noticed a tendency to start the music early and the message starts at about XX00 and XX30. It does not do this all the time, but frequently enough to be noticed.*

*M94 is still, surprisingly, on the air with 4 transmissions, 2 messages repeated for 2 days, each month. The only ID observed this month was 935. I believe I have not logged anything but 935 for several months.*

*The new V24 / M94 schedule (**see below**) can be found as a JPG at the same URL as it has been in the past:*  
[http://token.radio.home.mchsi.com/V24\\_M94\\_latest\\_sched.JPG](http://token.radio.home.mchsi.com/V24_M94_latest_sched.JPG)

*It can be found as a Word doc at:*  
[http://token.radio.home.mchsi.com/V24\\_M94\\_sched\\_1Q\\_2013.doc](http://token.radio.home.mchsi.com/V24_M94_sched_1Q_2013.doc)

*That is all for V24 and M94 as seen here this past month.*

*T!*

You can find Token's logs in the LOGS SECTION.

30						5115 !!	6310 !!		
31						5115 !!	6310 !!		

M94 is still active, but only 2 messages, 4 transmissions, per month. All messages are addressed to "935".

M94 is indicated on the chart with light blue background: 5115

Notes and special conditions:

!! = only seen when this is the last day of the month only

? = only seen one time, possible error transmission

\* = seen only on alternate months, odd months

\*\* = seen only on alternate months, even months

## V26

Although we see not many logs here, V26 seems to be very much alive. T sent us the following report on March 16<sup>th</sup>.

*V26 currently (and for the last couple of years) uses two "sets" of frequencies that I am aware of. Set A is 9153, 7553, and 4283 kHz. Set B is 9054, 7345, and 4243 kHz. It is fairly common that one frequency is missing from a set during a transmission cycle, most often the 7 MHz frequency. I have not been able to determine a cycle or predictability to this missing frequency. Mode used by V26 for all frequencies is USB, except when there is an error. Mode errors are not common, but I note them a few times a year, one time I noted each of the three frequencies on a different mode, USB, LSB, and AM.*

*V26 is preceded on frequency by 2 other signals, all of variable length. First up on the frequency is a Chinese 4+4 modem in LSB. After the 4+4 completes a CW signal is heard, carrying the designation M95. This signal used to be most frequently seen on*

one of the frequencies listed above, now it tend so to be 1 kHz lower, possibly as a result of the transmitter being left in LSB after completing the 4+4 modem. After M95 completes V26 comes up in USB.

V26 and friends does not keep a hard fixed schedule. Start times are "about" so that if you hear them today on a frequency at a specific time you will probably hear them tomorrow at about the same time and on the same frequency. The 4+4 modem seems to start about the same time each day (+/- 10 minutes), but, since the other signals follow each other, the length of each segment determines when the next will start resulting in pretty wide variations by the time they get to V26. So a long message on the 4+4 means M95 will shift its starting time later with V26 starting even later yet.

These signals are on multiple times a day. It is not uncommon to hear set B used and then set A starting 10 or 20 minutes later. At this particular time, for example, there appears to be at least two transmissions sets a day, set B seems to be starting about 0900 and set A starting about 1000, and then later set B starts about 1200 and set A starts about 1300. There may be other times each day as well. In the past I have heard as many as 4 cycles per day, meaning each frequency set used 4 times in 24 hours, or 8 scheduled times in 24 hours.

T! from Mojave Desert, California, USA

Most of the M32c logs are from Tom and Tony. Thanks to everyone who contributed.

This is an interesting net. I wonder if the markers mean anything. They are using 5 different markers, K, L, N, R, W. Maybe the markers indicate that a certain type of message will follow. Something like that. On the other hand, maybe they don't mean a thing :-)

Msg nr 027 appears to be the same as msg nr 024 sent at 2300 UTC, 06-03 except for the last group which is different

It should be noted that before the last group is sent, the format II = is used – until now I've only been showing the =, but it is in fact II =

At the moment it appears that the same msg may be sent several times during a 24 hour period using a different message number. (From my observations so far, M89 stations appear to QSL the Date Time Group (DTG) of messages and not the message number.

After looking at previous messages sent by Q7NW and comparing the format of messages being sent by 2SLC, I'm now more convinced that Q7NW has changed his call sign to 2SLC as well as changed freqs. Q7NW messages had the same format as 2SLCMSG NR XXX CK 301 44 XXXX XXXX = When sending COMM messages, Q7NW format was CQ 63 RMKS XXXX TO XXXX ..... COMMS AAS - refer to yesterday's COMM msg sent by 2SLC and you'll see the same format.

5555 kHz, 22-03, 1604 UTC:

## UTILITY ROUND-UP

## ***Polish Military***

**Evan copied an unid Polish military net. Most probably an army net.  
4847 kHz, 27-03, 1230-1300 UTC, voice and digital transmissions.  
Callsigns: Opylacz70 and Stek57**

## Polish Air Force

Tony recorded the usual Wednesday morning exercises of the Polish Air Force on 6354 kHz USB, 13-03, 0700-0730 UTC.

### Notes:

1. It started at 0700 UTC instead of the usual 0730
2. There didn't seem to be a use of a collective callsign this time. "Control" called individual callsigns
3. The message format appeared to be different. It was still structured, but wasn't groups of letters
4. Recording: <http://snd.sc/ZC7Xbo>

### Dictionary:

"tu" = "this is", "Odebrano" = "Received", "rozdzial" = "Chapter"

### Callsigns:

WWU (Control), WGA, KWO, M35, J9J.

0705 UTC: WGA tu WWU HZMM powtarzam (repeat)  
0709 UTC: WGA tu WWU HZLBMB  
0712 UTC: WGA tu WWU rozdzial YWSO powtarzam  
(tu) WGA czekac (standby)  
tu WGA rozdzial  
WGA tu WWU odebrano  
0713 UTC: KWO tu WWU rozdzial  
tu WGA  
WGA tu WGA odebrano  
KWO tu WWU  
0714 UTC: J9J tu WWU rozdzial  
M35 tu WWU rozdzial  
J9J tu WWU rozdzial  
0716 UTC: KWO tu WWU (Polish)  
rozdzial KWO rozdzial  
(message in Polish, not groups as before, but in a structured format, maybe numbers??)  
(Ends) OYNPKEUD (authentication??)  
0719 UTC: tu WGA (Polish)  
WGA tu WWU odebrano  
J9J tu WWU odebrano  
0720 UTC: M35 tu WWU rozdzial

The following logs and comments come from Ron, Geir and Maciej. Thanks for that.

11178 kHz, 27-03, 1042 UTC: Unid wkg aircraft PLF-020 passing flt route information.  
11178 kHz, 27-03, 1102 UTC: PLF-252 (Lockheed C-130E Hercules) clg Arkada-25. Point 6 reached ETA 12:34 (unreadable)  
11178 kHz, 27-03, 1146 UTC: PLF-40 another Casa calling probably Arkada-25 (mostly unreadable)  
11178 kHz, 27-03, 1204 UTC: PLF-252 again working Arkada-25 giving eta to ?? at 14:41 UTC.  
11178 kHz, 27-03, 1337 UTC: Arkada-25 rxed and established another radio check at 13:37. PLF252 ack and tnx. Another pilot:  
Czesc Lukasz (Hi, Lukasz). PLF252: ack  
PLF252: Wojtek , slyszysz mnie (Wojtek, do you copy me?). PLF252: Hi, where are you? Air Bis?:  
We're just breathing over Zurich. PLF252: We are reaching Luxembourg so we might copy each  
other later. PLF038 calling Arkada25 on 11178 kHz, (another Casa C295/21). Radio check... and  
then "As you might have heard, sir, ... ??? behind us" - sounds like they were climbing and  
crossed alt point. PLF038 might be the one who first came as ERBIS (AirBis) in loose chat with  
PLF252  
11178 kHz, 27-03, 1438 UTC: PLF0-40 calling Arkada25  
11178 kHz, 28-03, 1122 UTC: PLF-25 clg Arkada-25  
11178 kHz, 28-03, 1221 UTC: Arkada w/PLF 025 with flight information.

## Beacons

Chris found again a number of ditter beacons but not on the same frequencies as last time (see N&O 183).  
Chris found the ditters on these frequencies so far: 10670, 10830, 10990, 11150, 11830 kHz.

---

## Unid stations

Unid, possibly US diplo related. If you have any info for us, please let us know.

8058.6 kHz, 13-03, 1015 UTC.

Recording: <http://snd.sc/ZzjhFa>

Copied by Tony. Tony reports: *After going through the recordings it seems it's a weekly radio check after a "thanks for the weekly radio check".*

*KWX90 does a "Challenge Authenticate" with KWT94 - "Challenge TZ". Then KWT94 Challenges back with "Challenge CD", answer "S". Additional callsign: KWX92*

---

Igor copied a station on 7050 kHz, 12-03, 1021 UTC, CW. Callsign BA2AU. Most probably a Chinese radio amateur but the message is somewhat suspicious, unless it was a morse training of course ☺

## ***Intelligence Profile:***

### **Negara Brunei Darussalam**

#### **BACKGROUND**

The Sultanate of Brunei's influence peaked between the 15th and 17th centuries when its control extended over coastal areas of northwest Borneo and the southern Philippines. Brunei subsequently entered a period of decline brought on by internal strife over royal succession, colonial expansion of European powers, and piracy. In 1888, Brunei became a British protectorate; independence was achieved in 1984. The same family has ruled Brunei for over six centuries. Brunei benefits from extensive petroleum and natural gas fields, the source of one of the highest per capita GDPs in Asia.

#### **GENERAL**

Country name: Negara Brunei Darussalam (Brunei Darussalam)  
Short name: Brunei  
Capital: Bandar Seri Begawan  
Districts: Belait, Brunei-Muara, Temburong, Tutong

#### **MILITARY BRANCHES**

Royal Brunei Armed Forces: Royal Brunei Land Forces, Royal Brunei Navy, Royal Brunei Air Force (Tentera Udara Diraja Brunei)

#### **INTELLIGENCE & SECURITY AGENCIES**

Brunei Research Department is Brunei's external intelligence agency  
Brunei Internal Security Department (BISD)  
Directorate of Intelligence

**Brunei Internal Security Department (BISD)** is one of the departments under the Prime Minister's Office, which was set up on 1st August 1993. BISD's main office is located at Jalan Utama Mentiri whereas three other branches are located in the Tutong, Belait and Temburong district.

BISD's mission is to give early warning to the government on any imminent threats to protect the country including the public and properties in Brunei. By doing so, the government would be able to take necessary precautions to avoid or reduce any harm that may be caused by such threats.

BISD's role and responsibility is to monitor and report to the government on internal security issues. The lists of internal security issues monitored by BISD are as follows :

- Subversion  
Any attempt may it be by an individual, group or an organisation aimed to jeopardize the national security, or to overthrow His Majesty's Government or the country's Constitution in a manner resorting to violent means or in any manner which contradicts the Constitution
- Espionage  
Any attempt to obtain government-classified information or document illegally in order to assist a foreign power or gov-

ernment or to achieve specific objectives.

- **Sabotage**

Any act intended to cause physical damage to significant places and essential services in the country or to carry out (intentionally) any activities, which are detrimental to the country's economic interests to jeopardize public confidence towards the government.

- **Terrorism**

The use of various means of violence, threats and terror by individual, group or organisation intended to intimidate and instill fear towards the civilian population and their property to further their political or religious aim and ideology.

- **Promotion of racial and religious violence**

To promote feelings of enmity and resentment between different racial groups or different religion in order to instill values, beliefs and practice of the minority group towards another group or groups (majority).

---

The **Directorate of Intelligence** of the Royal Brunei Armed Forces has the following tasks:

- Render intelligence services to Ministry of Defence and Royal Brunei Armed Forces in a timely, accurate, objective and useful fashion.
- Act as the point of contact for all foreign defence and military organisation to Ministry of Defence and Royal Brunei Armed Forces.
- Train and guide Ministry of Defence and Royal Brunei Armed Forces personnel in intelligence and security activities

---

The Brunei **Research Department** is Brunei's external intelligence agency. Aside from a Wikileaks article, no information on them exists

#### **BACKGROUND**

During the late 18th and 19th centuries, Great Britain established colonies and protectorates in the area of current Malaysia; these were occupied by Japan from 1942 to 1945. In 1948, the British-ruled territories on the Malay Peninsula except Singapore formed the Federation of Malaya, which became independent in 1957. Malaysia was formed in 1963 when the former British colonies of Singapore as well as Sabah and Sarawak on the northern coast of Borneo joined the Federation. The first several years of the country's independence were marred by a Communist insurgency, Indonesian confrontation with Malaysia, Philippine claims to Sabah, and Singapore's departure from the Federation in 1965. During the 22-year term of Prime Minister MAHATHIR bin Mohamad (1981-2003), Malaysia was successful in diversifying its economy from dependence on exports of raw materials to the development of manufacturing, services, and tourism. Prime Minister Mohamed NAJIB bin

Abdul Razak (in office since April 2009) has continued these pro-business policies.

---

#### GENERAL

Country name: Malaysia  
Former name: Federation of Malaya  
Capital: Kuala Lumpur  
1 Federal Territory: consisting of Kuala Lumpur, Labuan, and Putrajaya  
13 States: Johor, Kedah, Kelantan, Melaka, Negeri Sembilan, Pahang, Perak, Perlis, Pulau Pinang, Sabah, Sarawak, Selangor, Terengganu

---

#### MILITARY BRANCHES

Malaysian Armed Forces (Angkatan Tentera Malaysia, ATM): Malaysian Army (Tentera Darat Malaysia), Royal Malaysian Navy (Tentera Laut Diraja Malaysia, TLDM), Royal Malaysian Air Force (Tentera Udara Diraja Malaysia, TUDM)

---

#### INTELLIGENCE & SECURITY

Special Branch

Kor Risik Diraja / Royal Corps intelligence

Bahagian Staf Perisikan Pertahanan - BSPP / Military Intelligence Staff Division

---

The **Malayan Security Service (MSS)** was the main intelligence agency of the British when they returned to Singapore in September 1945 following the Japanese surrender at the end of World War II. It was responsible for obtaining and collating information on subversive organisations and personalities in Singapore/Malaya. It was disbanded in August 1948 just after the start of the Malayan Emergency, and its functions were taken over by the Singapore and Malayan Police Special Branches.

---

The **Special Branch** is an intelligence agency of the Royal Malaysian Police. The SB is empowered to acquire and develop intelligence on internal and external threats to the nation, subversive activities, extremist activities and activities of sabotage and spying. It is also empowered to analyse and advise on the necessary course of action to the various departments and agencies both within the Police Department and other related agencies.

---

The **Kor Risik Diraja (KRD)** was established on 7 November 1969 and includes

- Bahagian Staf Perisikan Pertahanan - BSPP / Defence Intelligence Staff Division
- Anggota Tentera Cawangan Khas - ATCK / Military Intelligence Special Branch
- Rejimen Khas Perisikan Tempur - RKPT / Special Regimental Combat Intelligence
- Cawangan Perisikan / Intelligence Branch
- Jabatan Arah Risik / Intelligence Directorate
- Intelligence Training Centre

The KRD specializes in intelligence gathering, intelligence analysis, psychological warfare, surveillance, espionage, reconnaissance and counter-intelligence operations. It also manages the propaganda and counter-propaganda effort of the Malaysian Army.

---

**Defence Staff Intelligence Division** is the military intelligence agency of Malaysia Armed Forces. It consists of three services namely army intelligence, naval intelligence and air force intelligence.

## ***Intelligence profile***

### ***Papua New Guinea***

#### **BACKGROUND**

The eastern half of the island of New Guinea - second largest in the world - was divided between Germany (north) and the UK (south) in 1885. The latter area was transferred to Australia in 1902, which occupied the northern portion during World War I and continued to administer the combined areas until independence in 1975. A nine-year secessionist revolt on the island of Bougainville ended in 1997 after claiming some 20,000 lives.

#### **GENERAL**

Country name:	Independent State of Papua New Guinea
Short name:	Papuanigini (Papua New Guinea)
Former name:	Territory of Papua and New Guinea
Capital:	Port Moresby
1 District:	National Capital
1 Autonomous region:	Bougainville
20 Provinces:	Central, Chimbu, Eastern Highlands, East New Britain, East Sepik, Enga, Gulf, Hela, Jiwaka, Madang, Manus, Milne Bay, Morobe, New Ireland, Northern, Sandaun, Southern Highlands, Western, Western Highlands, West New Britain

#### **MILITARY BRANCHES**

Papua New Guinea Defense Force (PNGDF; includes Maritime Operations Element, Air Operations Element)

#### **INTELLIGENCE & SECURITY**

National Security Council  
National Intelligence Organization  
Royal Papua New Guinea Constabulary

The **National Security Council** consists of

- the Prime Minister, who shall be Chairman
- the Deputy Prime Minister
- the Minister responsible for defence matters
- the Minister responsible for foreign affairs and trade matters
- the Minister responsible for provincial affairs matters
- the Minister responsible for police matters
- the Minister responsible for financial matters

The functions of the Council are

- to determine and direct the action to be taken in respect of matters affecting the sovereign integrity and security of Papua New Guinea and the security of its people; and
- to provide guidance and direction to those elements of Government which are responsible for
  - matters affecting the maintenance of good order in Papua New Guinea; and combating subversion and espionage; and providing defence against military attack or armed incursions into Papua New Guinea's sovereign territory or the use of military pressures against Papua New Guinea or activities designed to undermine the security of Papua New Guinea and its people; and

- to review, direct and provide guidance for the activities of the Committee and of the Organization.

The **National Intelligence Organization (NIC)** is the intelligence agency of Papua New Guinea. It was established by the National Intelligence Organization Act, an Act of Parliament in 1984. The NIC is headed by a Director-General of Intelligence, appointed by the Head of State.

The Act specifies that, before authorising the NIC to "collect intelligence information outside the country by other than overt means", the Director-General must obtain written authorisation from the Prime Minister. (art.12)

The NIC may not search any person or premises, nor subject any person or premises to listening devices, nor access or intercept a person's post, without a warrant delivered by the National Security Council, which consists in the Prime Minister and various Cabinet Ministers. (part VI)

The identity of the Organization's agents and employees (other than the Director-General) is to be kept secret, and divulging the identity of any such agent or employee is an offence. (art.47)

The functions of the National Intelligence Organization are to collect, collate and process intelligence information and to provide to the National Executive Council, Departments and other bodies or persons approved by the National Executive Council, timely, accurate and impartial assessments, forecasts and reports in respect of

- matters affecting the maintenance of good order in the country; and
- the combating of seditious enterprises, espionage and sabotage and the provision of warning of potential military attack, armed incursions into the territory of Papua New Guinea or the use of military pressures against Papua New Guinea; and
- the preservation of national sovereignty and the detection of any attempts by a foreign power or person to engage in political, military or economic activities contrary to Papua New Guinea's interests; and
- the prospects for world and regional, political, economic and social stability insofar as these could have implications for, or could affect, Papua New Guinea; and
- future trends of the availability of resources and of prices as these could have implications for Papua New Guinea.

## ***Intelligence profile*** **Sri Lanka**

#### **BACKGROUND**

The first Sinhalese arrived in Sri Lanka late in the 6th century B.C., probably from northern India. Buddhism was introduced in about the mid-third century B.C., and a great civilization developed at the cities of Anuradhapura (kingdom from circa 200 B.C. to circa A.D. 1000) and Polonnaruwa (from about 1070 to 1200). In the 14th century, a south Indian dynasty established a Tamil kingdom in northern Sri Lanka. The coastal areas of the island were controlled by the Portuguese in the 16th century and by the Dutch in the 17th century. The island was ceded to the British in 1796, became a crown colony in 1802, and was formally united under British rule by 1815. As Ceylon, it became independent in 1948; its name was changed to Sri Lanka in 1972. Tensions between the Sinhalese majority and Tamil separatists erupted into war in 1983. After two decades of fighting, the government and Liberation Tigers of Tamil Eelam (LTTE) formalized a cease-fire in February 2002 with Norway brokering

peace negotiations. Violence between the LTTE and government forces intensified in 2006, but the government regained control of the Eastern Province in 2007. By May 2009, the government announced that its military had defeated the remnants of the LTTE.

Capital: Colombo  
9 Provinces: Central, Eastern, North Central, Northern, North Western, Sabaragamuwa, Southern, Uva, Western

---

#### MILITARY BRANCHES

Sri Lanka Army, Sri Lanka Navy, Sri Lanka Air Force

---

#### INTELLIGENCE & SECURITY

State Intelligence Service  
Financial Intelligence Unit

---

##### State Intelligence Service

Until 1984, the Sri Lanka Police were responsible for internal intelligence functions, first under the Special Branch, and later under the Intelligence Services Division. The perceived failure of the Intelligence Services Division during the riots of July 1983 led the government to re-evaluate the nation's intelligence network, and in 1984 the President set up a National Intelligence Bureau. The new organization combined intelligence units from the Army, Navy, Air force, and Police. The agency has been renamed in 2006 and is now known as the State Intelligence Service.

The Service is one of the Directorates of the Ministry of Defence. Its primary function is collection of internal and external intelligence, counter-terrorism and covert operations. In addition, it is responsible for obtaining and analyzing information about foreign governments, corporations and persons in order to advise Sri Lankan foreign policymakers.

The SIS has its headquarters in Colombo, Sri Lanka and includes the following directorates: Directorate of Internal Intelligence, Directorate of Foreign Intelligence, Joint Service Language Training Institute, and the National Cadet Corps.

---

##### Financial Intelligence Unit

The FIU-Sri Lanka was established in March 2006 under the Financial Transactions Reporting Act No. 06 of 2006 and vested with Ministry of Finance and Planning. The FIU functions as a unit in the Central Bank of Sri Lanka. The overall objective of the FIU - Sri Lanka is to combat money laundering, terrorist financing and related crimes in Sri Lanka in line with international regulations and standards.
